

FOUNDATION ASSEMBLY INSTRUCTIONS

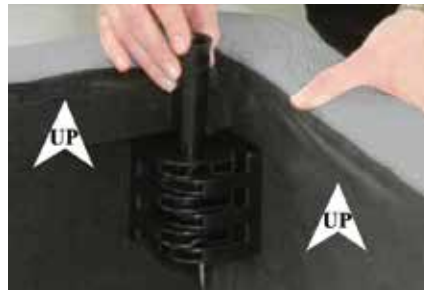

No tools required for easy assembly! Please begin by carefully removing all components from the carton. Included in carton:

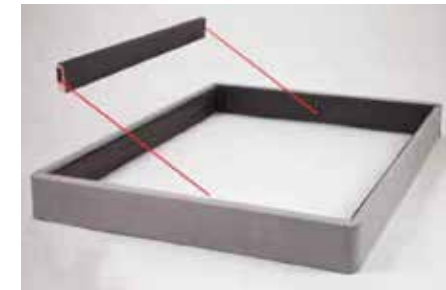

- A Side Rails** (2). Both side rails are identical and may be used on either side of the foundation.
 - B End Rails** (2). Both end rails are identical and may be used on either side of the foundation.
 - C Center Support Rail** (1). Unless King/Cal King, then 2 each.
 - D Support Slat Packs** (2).
 - E Fast Loc Pins** (4). All four pins shipped installed in side/end rails.
 - F Instruction Sheet** (1). FAQ's on reverse side.
- Note: White "Up Arrows" will indicate proper position of components for assembly.

Step 1: Align Fast Loc blocks in each of the four corners.

Step 2: Insert Fast Loc pins into each of the four Fast Loc blocks, pushing firmly until secure.

Step 3: Slide center support rail onto notches on each end rail.

Step 4: Set support slat packs flush against the end and side rails, then unroll each towards center.

Step 5: Congratulations!
Your Agility foundation is complete!
